

**Old National Bancorp: Preventive Maintenance List**

*Effective January 1, 2025*

Guidelines for high-deductible plans allow for preventive prescription medications to be excluded from deductible. All other drugs covered under the plan benefit will be subject to the deductible until it is met. Drugs on the list were evaluated and selected based on IRS guidance and clinical validation to ensure that the indications for which they are commonly prescribed are considered preventive within established guidelines. Cost or formulary status was not a factor in the evaluation and approval process. Note: Depending on some prescription medications' forms (e.g. cream vs. tablet) or strengths, they may not be deemed preventive. Prior authorizations, coverage exclusions, quantity limits, or step therapy requirements may still apply. You may contact MaxorPlus to verify whether your prescription form or strength is deemed preventive.
